Projects

Raging Raymond's Fish Fight | https://github.com/swazunga/raging-raymond-project | https://raging-raymond.herokuapp.com/

Full Stack developer

- A site developed to promote a fishing tournament that raises funds to fight the VAMP-2 disorder
- This was a collaborative project in which I took the lead setting up the database structure including chat functionality, the sign-in/log-in functions, the photo gallery, and front end display of chat information.
- Tools/Languages: MongoDB, JavaScript, NodeJS, Express, and React

Lingo | https://github.com/RevChrisWarren/language-app
| https://mysterious-inlet-45382.herokuapp.com/

Full Stack Developer

- An app that allows the user to create flash cards to help learn a foreign language
- In this project I took the lead on creating and managing the SQL database, the login functionality, and the homepage.
- Tools/Languages: HTML, CSS, SQL, Express, Node
